METHOD OF MANUFACTURING A TUNING FORK WITH REDUCED
QUADRATURE ERROR AND SYMMETRICAL MASS BALANCING

IN THE SPECIFICATION

Amend Page 4, lines 1 - 2 to read as follows:

Sub C4 A1
Figure 3 is a view similar to Figure 2, illustrating the balancing masses being trimmed with a laser to reduce quadrature error.

per 3/1/02
Amend Page 4, lines 12 - 20 to read as follows:

AD
The mass elements can be trimmed by any suitable means such as a laser 30. In one presently preferred embodiment, the tines are fabricated of a material such as crystalline quartz which is transparent to the laser beam, and all of the masses are trimmed from the same side of the fork. Thus, for example, the laser might be positioned on the front side of the fork, with the laser beam 30a passing through the fork to trim elements 28, 29 on the back sides of the tines. Alternatively, if desired,
